Subject: Save our water

Good morning,

I received notification that there will be important decisions being made about our water. Please vote to keep our waters clean as well as keep our water supply intact. This precious water needs to be protected not just for me but for future generations. Please approve the below motions on your agenda today:

- Motion to include the Colorado River Alluvium in the group of aquifers considered in the next round of DFC review.
- Motion to hold the current DFCs at same levels while the nine factors for consideration for adopting the fourth round of DFCs are adequately renewed.

Sincerely,
Claydeen Harrell
Blue, Lee county
