POSGCD
Board of Directors
Attn: Courtney Gentry

Courtney,

The City of Rockdale is asking for approval to modify the 2025 Grant. This request is the result of difficulties in the design, engineering, and purchase of VFD's for various motors within our water pumping and delivery systems. Additionally, we have had several issues with silica and iron at our airport wells that required significant costs to remedy. We would like to submit the following costs for reimbursement as part of the 2025 POSGCD Grant.

1) Well #8 complete well service including new pump, motor and casing. $91,352
2) New AMI meters for customer accounts. With these additional meters, the Rockdale PWS will have replaced approximately 95% of AMR meters with AMI fixed base meters. $58,498
3) 420' of 6" water main replacement. This was a water conservation project to connect two sections of our Water Distribution System upgrade. The addition of this 420' of 6" main eliminates two dead ends in the center of town. By connecting these sections, unnecessary flushing and poor water quality for customers is no longer a problem. $56,925

Thank you for your support as we upgrade our systems and reduce water loss.

Jerald Brunson
